U.S.-Peru Trade Promotion Agreement Delaware Farmers Will Benefit

November 2007

The U.S.-Peru Trade Promotion Agreement (PTPA) provides increased market access to Delaware's agricultural exports by making agricultural trade a two-way street and leveling the playing field with respect to third country competitors in the Peruvian market. With immediate elimination of duties on nearly 90 percent of current U.S. trade to Peru, the PTPA will provide Delaware producers and exporters the opportunity not only to preserve but to increase market share in Peru. The American Farm Bureau and over 40 other agricultural industry and farm groups strongly support the agreement stating that the agreement would benefit all U.S. agricultural sectors and allow the United States to become a competitive supplier of agricultural products to Peru.

Exports of farm products boost Delaware's farm prices and income. Such exports support about 1,700 jobs both on and off the farm in food processing, storage, and transportation. Agricultural exports amounted to \$145 million and made an important contribution to Delaware's farm cash receipts in 2006 that totaled \$969 million.

Poultry. Contributing over 76 percent of the state's farm cash receipts at \$739 million and as the state's leading export sector, Delaware's poultry producers benefit from the PTPA.

Peru will phase out the 25-percent over-quota tariff over 17 years with no reductions during the first eight years.
- Peru will phase out duties on poultry products, such as wings and breast meat, over five years and on mechanically separated meat over two years. Most tariffs on turkey products will be phased out over five years.
